

Pharmacy Claims Purchasing Program

Guaranteeing 100% medication access for workers'-compensation patients, while generating a compliant ancillary revenue stream for your practice.

THE OPPORTUNITY

In workers'-compensation, roughly a third of patients can't reliably fill their prescriptions at retail pharmacies, a care gap driven by billing risk. This program routes those scripts to a partner mail-order pharmacy and moves the entire revenue cycle off your office.

~30%

of WC patients struggle to obtain their medications at retail pharmacies

\$0

out-of-pocket cost to the patient for covered WC medications

15

states live, backed by legal opinions in each, including Pennsylvania

HOW THE TRANSACTION WORKS

CLINICAL FLOW

1

Physician writes the Rx
Sent via e-prescribing

2

Pharmacy ships to patient
Mailed to the patient's home

Patient gets their medication
100% of the time the claim is open.

FINANCIAL FLOW (managed by MDRx)

3

Pharmacy sells claim at FMV

4

Claim assigned to MDRx

5

MDRx bills the payer

6

Payer pays MDRx

7

MDRx remits 65% to LLC

The pharmacy gets immediate cash flow; the payment risk — and the upside — transfers to your Physician, LLC.

Improves medication adherence

Nothing changes in how you prescribe

All billing & collections handled

Access to non-opioid alternatives

Pharmacy Claims Purchasing Program

THE ECONOMICS

Your Physician, LLC earns the spread between what it pays the pharmacy and what MDRx collects — compensation for carrying the collection risk the retail system avoids.

PAY IN

Buy the claim at FMV

Physician, LLC pays the pharmacy fair market value: drug cost + dispensing fee + shipping.

RISK

Carry the collection

MDRx bills and collects; Physician, LLC holds the risk of non-payment.

PAY OUT

Receive 65% of collections

MDRx remits 65% of all amounts collected back to Physician, LLC.

Net to the practice = 65% of collections – the FMV paid to the pharmacy. **Scales with volume; no inventory or staff burden.**

LEGAL & COMPLIANCE

Vetted by the Pennsylvania Supreme Court. In 700 Pharmacy v. Bureau of Workers' Compensation Fee Review (decided June 16, 2026), the Court confirmed that physicians may refer patients for prescription drugs to a pharmacy in which they hold a financial interest.

- ✓ The anti-referral ban applies only to eight enumerated services, prescription drugs are not among them.
- ✓ Self-referral for prescription drugs and pharmaceutical services is not prohibited under current law.
- ✓ Insurers cannot deny payment on the grounds of prohibited self-referral.

Full opinion and analysis: see the accompanying Law Offices of Daniel J. Siegel letter. Backed by legal opinions in each of MDRx's 15 operating states, including Pennsylvania.

HOW TO SUBMIT

E-Prescribing Route to the in-network pharmacy in your software.

Fax Send Rx + demographic sheet to the pharmacy.

DEMOGRAPHIC SHEET MUST INCLUDE

- Diagnosis code
- Claim number
- Allergies (or NKA)
- Date of injury
- WC insurance carrier
- Adjuster name & phone
